PRODUCT GUIDANCE SHEET

BRAKES CONCENTRATED TOILET CLEANER

A daily use toilet and urinal cleaner/descaler which dilutes to produce a viscous liquid which clings to sanitary ware surfaces to improve cleaning action. Pleasantly fragranced to safely and effectively clean stainless steel and ceramic toilets. To aid product recognition the Brakes concentrated Toilet Cleaner product label and the label on the flip-top bottle are blue.

Product Name: BRAKES CONCENTRATED TOILET CLEANER
Description: Super concentrated daily use toilet cleaner
Pack Size(s): 4x2ltr
Pallet Size(s): 64
Product Code(s): A84795
Re-Fill Bottles: 1x6
Product Code: A84790

HOW TO USE

Brakes Concentrated Toilet Cleaner must be diluted before use, using a Brakes bottle fill dispenser. To prepare a toilet cleaning solution, fill the labelled re-fill bottle with water following the instructions below and use the dispenser to add two shots into the bottle before fitting the directional nozzle cap; or dispense using an automatic chemical/water mixing station.

Step 1: Before use, flush toilet to remove all debris and allow the water to settle. Using a toilet brush, force some of the water in the bowl around the U-bend by digging the brush up and down in the water. This will allow the product contact time with any mineral salts/scale at the water level.

Step 2: Direct the product up under the rim and allow it to run down the inside of the toilet bowl. Leave for 2-3 minutes. Complete the remainder of the surrounding area cleaning tasks. Finally, scrub the toilet bowl with a toilet brush to remove any stubborn scale or soiling and flush toilet with brush in water to remove any product left in pan or on the brush.

Bottle Fill Instructions:

1. Unscrew flip-top cap from bottle and fill with water to the top of the label.
2. Insert bottle neck on to the dispensing nozzle and push upwards – priming the unit.
3. Position bottle on the base of the drip tray to allow dispensing to commence.
4. PULL lever towards you in an upward direction until it CLICKS. This is now ready to dispense.
5. To dispense product PUSH lever downwards. The concentrate will be dispensed into the bottle at the correct dilution to water. Add two shots of Concentrate to the bottle.
6. Remove the bottle from the base and screw flip-top cap onto the bottle. Turn bottle upside down to ensure thorough mixing has occurred.
7. WAIT for the green indicator to reappear in the window before inserting the next bottle for dispensing.

The safety information below and any hazard pictograms, refer to the concentrated product as supplied. When the product is diluted as recommended, the solution is not classified as hazardous, but normal hygiene precautions are advised. **Caution: Never use this product in conjunction with a chlorine based product. It will produce chlorine gases which can be fatal if inhaled.**

SAFETY ADVICE – WHEN HANDLING or DISPENSING THE CONCENTRATE

DANGER Causes severe skin burns and eye damage. Very toxic to aquatic life. Flammable liquid and vapour. Wear protective gloves and eye protection. Keep away from heat, sparks, open flames and hot surfaces – No smoking. Collect spillage. **IF ON SKIN (or hair):** Remove immediately all contaminated clothing. Rinse skin with water. **IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing. Immediately call a POISON CENTRE or doctor. **For further detailed information on this product please refer to the Safety Data Sheet. FOR PROFESSIONAL USE ONLY**

SAFETY ADVICE – WHEN USING THE DILUTED SOLUTION

Wearing eye protection is recommended when dispensing concentrate into bottle, but generally not needed for normal use of the cleaning solution. Wear suitable gloves. Avoid contact with eyes and skin. In case of contact with eyes, rinse immediately with plenty of water and seek medical attention. Keep out of reach of children.

COSHH STATEMENT

COSHH is a law that requires all employers to take steps to control substances (chemicals) that may cause harm to employees, contractors and visitors to the workplace. Every work environment will be different in terms of the hazardous chemicals that are present, and how these are used, and individual assessments may be necessary to consider how chemicals can be handled and stored safely, in addition to ensuring that appropriate PPE and training is provided for employees. Product SDS and Product Guidance Sheets are intended to help when carrying out a COSHH assessment, however if further advice is needed with regard to specific issues in your work environment we are happy to provide advice. **E-Mail Technical:** technical.solutions@rpadam.co.uk
