PRODUCT GUIDANCE SHEET

BRAKES LIQUID DEGREASER

A powerful low foaming, odourless detergent degreaser for the removal of the heaviest grease and ingrained organic soiling from a wide range of hard surfaces and process equipment. It is particularly effective at removing ingrained grease and grime from most types of flooring within the commercial catering environment where extra chemical energy is required. Ideal for use with scrubber dryers, it is a work horse formulation for all commercial cleaning applications. **Caution: Not recommended for use on aluminium or galvanised surfaces.**

Product Name: BRAKES LIQUID DEGREASER
Description: Floor cleaner and heavy duty degreaser
Pack Size(s): 5ltr
Pallet Size(s): 80
Product Code(s): A87078

HOW TO USE

It must be diluted correctly with water to prepare effective cleaning solutions. Product is dispensed via a standard 5lt pelican pump.

Weekly Heavy Duty Floor Cleaning:

Add 3/4 plunges dispenser for 3lt to 8lt, and 6 plunges per 12lt bucket capacity. For best results in commercial kitchens, mop the chemical/hot water solution onto the floor, leave the solution to work on the grease and grime for at least two minutes, then using an appropriate hard bristled brush, deck-scrub the floor. When completed, take a fresh, clean warm water solution and mop the floor free of chemical and residues.

Floor Scrubbing Machine:

Add 500mls per 80lt of water in the machine tank and scrub floor to remove grime and remove the slurry.

Floor Cleaning in Hard Water Areas:

If lime scale is present in the wash water it is a barrier to effective cleaning. It builds up over time and forms an invisible coating, preventing grease and grime removal. To remove scale films, clean the flooring periodically with a diluted solution of Brakes Descaler. Please seek advice from the manufacturer

Heavy Soiling & Ingrained Dirt:

Add 6 plunges of Brakes Liquid Degreaser to 10lts of hot water. Allow contact time and agitate if necessary with a deck scrubber to remove stubborn grime before rinsing with clean water.

Caution:

This product must not be used on sealed or polished floors, as it may affect the finish. It should not be used on zinc, aluminium or similar alloys as it may cause damage to the surface. Follow the recommended dilution rates and rinse thoroughly after use, as using an over-concentrated solution or poor rinsing can leave a white chemical residue that may be difficult to remove.

SAFETY ADVICE

DANGER Causes severe skin burns and eye damage. May be corrosive to metals. Wear protective gloves, protective clothing and eye or face protection. IF ON SKIN (or hair): Remove immediately all contaminated clothing. Rinse skin with water. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor. Absorb spillage to prevent material damage.

For further detailed information on this product please refer to the Safety Data Sheet.

FOR PROFESSIONAL USE ONLY

COSHH STATEMENT

COSHH is a law that requires all employers to take steps to control substances (chemicals) that may cause harm to employees, contractors and visitors to the workplace. Every work environment will be different in terms of the hazardous chemicals that are present, and how these are used, and individual assessments may be necessary to consider how chemicals can be handled and stored safely, in addition to ensuring that appropriate PPE and training is provided for employees. Product SDS and Product Guidance Sheets are intended to help when carrying out a COSHH assessment, however if further advice is needed with regard to specific issues in your work environment we are happy to provide advice. **E-Mail Technical:** technical.solutions@rpadam.co.uk
