PRODUCT GUIDANCE SHEET

BRAKES FABRIC CONDITIONER

For use in commercial and on premises laundries, this concentrated fabric conditioner utilises a blend of anti-static fabric conditioning agents that are designed to leave fabrics with a soft feel and fresh fragrance. It coats the surface of the fibre with an invisible layer which has lubricating qualities, makes the fibres feel smoother and prevents the build-up of static electricity. **Caution: Do not use on micro-fibre materials or bed pads/mattress protectors.**

Product Name: BRAKES FABRIC CONDITIONER
Description: Concentrated liquid laundry fabric conditioner
Pack Size(s): 2x5ltr
Pallet Size(s): 80
Product Code(s): A7594

HOW TO USE

Wash programme chemical dose rates are set for each site based on local conditions, wash types and machinery, and are devised following an extensive site survey and audit of laundry wash processes. **Manual Dosing:** Add 1-5ml per kilo of dry weight load into the hopper of the machine.

COLLECTING SOILED LINEN

- Always wear rubber gloves when collecting linen from areas of use i.e. bed linen, towels/ personal clothing.
- Place in appropriate receptacle and transfer to laundry

SORTING OF LINEN

- Wear gloves when pre-sorting linen
- Segregate colours and whites and check care labels

LOADING WASHER

- For un-bagged linen, load items one at a time to avoid tangling
- Load with appropriate amount/weight of soiled linen (approximately 80% of machine capacity)

- Select correct wash process N.B. do not stop or advance wash cycle as this can cause chemical damage to fabrics and cause the auto dosing to fail

UNLOADING WASHER

- When cycle is finished, unload clean linen into a clean linen cart or trolley and transfer to dryers

LOADING/UNLOADING DRYERS

- Load dryers with appropriate load weight
- Select correct process time including cool down option for poly-cottons
- Do not over dry as this can cause yellowing/greying of fabrics, ironing problems and lead to fire risk
- Remove all linen from dryer as soon as cycle is finished to minimise creasing and avoids bottle necks in laundry

FINISHING

- Iron garments whilst still damp (do not allow to over dry)

OTHER TOP TIPS

- Neither under load nor overload the washing machines
- Always check that pockets are empty prior to washing
- Keep clean linen away from soiled linen or soiled carts and avoid contact with floor
- Only wash what you have time to dry – i.e. do not leave wet washed linen overnight
- Always ensure that the storage area for clean linen is well ventilated

SAFETY ADVICE

Not classified as hazardous, however we advise that normal cleaning safety practises are adopted. Wear rubber gloves when handling and avoid contact with eyes. In case of contact with eyes, rinse immediately with plenty of water and seek medical attention if irritation persists.

For further detailed information on this product please refer to the Safety Data Sheet.

FOR PROFESSIONAL USE ONLY

COSHH STATEMENT

COSHH is a law that requires all employers to take steps to control substances (chemicals) that may cause harm to employees, contractors and visitors to the workplace. Every work environment will be different in terms of the hazardous chemicals that are present, and how these are used, and individual assessments may be necessary to consider how chemicals can be handled and stored safely, in addition to ensuring that appropriate PPE and training is provided for employees. Product SDS and Product Guidance Sheets are intended to help when carrying out a COSHH assessment, however if further advice is needed with regard to specific issues in your work environment we are happy to provide advice. **E-Mail Technical:** technical.solutions@rpadam.co.uk
