## PRODUCT GUIDANCE SHEET

### BRAKES VIRUCIDAL CLEANER SANITISER

A multi-surface cleaner/sanitiser with proven effectiveness against a wide spectrum of bacteria, viruses and fungi. Independently tested to BS EN 1276 standard for biocidal efficacy at a contact time of 5 minutes. Tested against a recognised Norovirus surrogate and has proven effective in controlling viral outbreaks in the education, hospitality and leisure sectors.

Product Name: BRAKES VIRUCIDAL CLEANER SANITISER  
Description: Ready to use virucidal multi-purpose cleaner & sanitiser (BS EN 1276 approved)  
Pack Size(s): 3x750ml  
Pallet Size(s): 200  
Product Code(s): A84799

### HOW TO USE

Brakes Virucidal Cleaner Sanitiser is used directly from the bottle as a ready to go solution and requires no dilution with water.

- A highly effective multi-surface cleaner and disinfectant with proven effectiveness against a wide spectrum of bacteria, viruses and fungi.
- It has passed the BS EN 1276 standard for biocidal efficacy with a contact time of 5 minutes in dirty conditions. Also tested against a recognised Norovirus surrogate and has anecdotally been proven to be effective in controlling viral outbreaks in the education, hospitality and leisure sectors.
- Used for a wide variety of cleaning tasks in residential care, washroom, housekeeping, leisure and building services applications.
- Contains a blend of biocides and surfactants to clean and disinfect all hard surfaces effectively and should be used on all frequently touched surfaces, such as hand rails, door handles, toilet flushes and sanitary ware where the risk of cross contamination is highest.

**Caution:**

Do not allow to dry onto glass surfaces.

**Clean-As-You-Go Hygiene**

Remove gross debris. Spray directly onto the surface or equipment. Depending on the degree of soiling allow sufficient time for the product to penetrate the soil. Agitate heavily soiled areas if necessary, then simply wipe away with a clean cloth or absorbent paper to leave a fresh clean surface.

**Cross-Contamination Prevention**

Where there is a risk of cross contamination, we recommend a two stage process as best practice:

**Stage 1 Cleaning:** Remove debris then spray directly onto the surface or equipment and allow sufficient time for the product to penetrate the soiling, agitating heavily soiled areas if necessary. Rinse with fresh clean water or wipe down with a clean damp cloth.

**Stage 2 Sanitising:** Spray directly onto the surface, ensuring an even coverage. Allow 5 minutes contact time before rinsing the surface with fresh clean water or a clean damp cloth. Allow to air-dry or dry the surface with a separate clean dry cloth.

**SAFETY ADVICE**

Not classified as hazardous, however we advise that normal cleaning safety practises are adopted. Wear rubber gloves when handling and avoid contact with eyes. In case of contact with eyes, rinse immediately with plenty of water and seek medical attention if irritation persists.

**For further detailed information on this product please refer to the Safety Data Sheet.**

**FOR PROFESSIONAL USE ONLY**

**COSHH STATEMENT**

COSHH is a law that requires all employers to take steps to control substances (chemicals) that may cause harm to employees, contractors and visitors to the workplace. Every work environment will be different in terms of the hazardous chemicals that are present, and how these are used, and individual assessments may be necessary to consider how chemicals can be handled and stored safely, in addition to ensuring that appropriate PPE and training is provided for employees. Product MSDS and Product Guidance Sheets are intended to help when carrying out a COSHH assessment, however if further advice is needed with regard to specific issues in your work environment we are happy to provide advice. **E-Mail Technical:** [technical.solutions@rpadam.co.uk](mailto:technical.solutions@rpadam.co.uk)
